

## Comparing Overwatch® Herbicide to Propyzamide Herbicides in Canola

When you have Overwatch® in the mix, you're ready for anything. By delivering broad spectrum control of many important weeds including up to 12 weeks residual activity on annual ryegrass and a nil re-cropping interval to wheat, barley, canola and select pulse crops, only Overwatch® Herbicide gives you the flexibility you need when the season turns against you.

### Key Points:

- ✓ Overwatch® Herbicide provides market leading Annual ryegrass control<sup>^</sup> in Canola with the unique Group 13/Q mode of action
- ✓ Overwatch® Herbicide can be used in all Canola herbicide systems with complimentary weed activity to each system's recommended herbicides
- ✓ With a zero day plant back interval to Wheat and Barley, the use of Overwatch® Herbicide provides replant options if Canola does not successfully establish due to pest, disease or climatic conditions.

Product Comparison:	Overwatch® Herbicide	Rustler® Herbicide
Active Constituent	400 g/L Bixlozone	500 g/L Propyzamide (Rustler®); 900 g/kg Propyzamide (Rustler® 900)
Formulation	Suspension Concentrate (SC)	Water dispersible granule (WG) and Suspension Concentrate (SC)
Group (formerly MOA)	Group 13 (Q)	Group 3 (D)
